## Experience

### ESET – UX Designer

January 2020 – Today

Cybersecurity

- Translating complex requirement of cyber security into delightful experience for millions of users
- Designed a new cybersecurity product from idea to market release
- Created Figma library for the design system that could be used by our design team to prototype faster when migrating from XD

### Lighting Beetle – UX Designer

February 2018 – December 2020

Design agency

- Building new products and improving existing ones for global impactful organizations by using UX methodologies, Design thinking, Lean and Agile methodologies.
- I had the chance to practice a wide variety of design techniques for clients such as Orange, ESET, the European Environment Agency and HB Reavis.

## Featured project

### AT&T – Smartwatch for Senior

January 2023 – April 2023

Freelance

- Designed the operating system of a smartwatch to help senior to monitor their health and warn their guardian in case of emergency
- Defined the style-guide and UI respecting accessibility principles
